### FITCH FUEL-SAVING CATALYST

**Claim:** "The Fitch Fuel Catalyst transforms gasoline and diesel into a superior quality of fuel, allowing a combustion engine to extract the maximum amount of energy with minimal emissions." The company makes no solid numerical claims, stating simply that the catalyst will "improve fuel economy."

**In use:** The Fitch inline kit included hoses to tie into Red's fuel rails, the Fitch inline canister with catalyst, mounting brackets, and even the tool to remove the fuel line from the fuel rail.

**Observed gains:** We noticed an approximate 2-mpg increase over stock with the Fitch system.

**Price:** \$177.45
